☐ M1A._____ 1 Chronic Gout, w/ Tophi

Other: _____

Prescribing Information

It is recommended that the patient discontinue oral urate-lowering medications 2-3 days (up to one week) before starting Krystexxa.

Recent data suggests that patients may have improved outcomes when immunomodulators are taken with Krystexxa.

- **The recommended dosage is Krystexxa 8 mg every two weeks, co-administered w/weekly methotrexate 15 mg orally.**
- **Krystexxa alone may be used in patients for whom methotrexate is contraindicated or not clinically appropriate.**

***REQUIRED*: Demographics and Most Recent: H&P, clinical notes, & medication list. Supporting clinical notes to include any past tried and/or failed therapies, intolerance, outcomes, or contraindications to conventional therapy.**
***LAB RESULTS*: : G6PD, baseline uric acid > 6.0 mg/dL.**
